
SECOND ENGROSSED SENATE BILL 5714

State of Washington 59th Legislature 2006 Regular Session

By Senators Keiser, Deccio, Kastama, Parlette, Thibaudeau,
McAuliffe, Brown, Rasmussen, Rockefeller and Kohl-Welles

Read first time 02/03/2005. Referred to Committee on Health & Long-Term Care.

1 AN ACT Relating to an early detection breast and cervical cancer
2 screening program; and adding a new section to chapter 43.70 RCW.

3 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF WASHINGTON:

4 NEW SECTION. **Sec. 1.** A new section is added to chapter 43.70 RCW
5 to read as follows:

6 (1) The legislature finds that Washington state has the highest
7 incidence of breast cancer in the nation. Despite this, mortality
8 rates from breast cancer have declined due largely to early screening
9 and detection. Invasive cervical cancer is the most preventable type
10 of cancer. The Pap test, used to detect early signs of this disease,
11 has been called "medicine's most successful screening test." Applied
12 consistently, invasive cervical cancer could nearly be eliminated. The
13 legislature further finds that increasing access to breast and cervical
14 cancer screening is critical to reducing incidence and mortality rates,
15 and eliminating the disparities of this disease in women in Washington
16 state. Furthermore, the legislature finds there is a need for a
17 permanent program providing early detection and screening to the women
18 and families of Washington state.

1 It is the intent of the legislature to establish an early detection
2 breast and cervical cancer screening program as a voluntary screening
3 program directed at reducing mortalities through early detection to be
4 offered to eligible women only as funds are available, and only so long
5 as the current federal funding level continues.

6 (2) As used in this section:

7 (a) "Eligible woman" means a woman who is age forty to sixty-four,
8 and whose income is at or below two hundred fifty percent of the
9 federal poverty level, as published annually by the federal department
10 of health and human services. Priority enrollment shall be given to
11 women as defined by the federal national breast and cervical cancer
12 early detection program, under P.L. 101-354.

13 (b) "Approved providers" means those state-supported health
14 providers, radiology facilities, and cytological laboratories that are
15 recognized by the department as meeting the minimum program policies
16 and procedures adopted by the department to qualify under the federal
17 national breast and cervical cancer early detection program, and are
18 designated as eligible for funding by the department.

19 (c) "Comprehensive" means a screening program that focuses on
20 breast and cervical cancer screening as a preventive health measure,
21 and includes diagnostic and case management services.

22 (3) The department of health shall administer a state-supported
23 early detection breast and cervical cancer screening program to assist
24 eligible women with preventive health services. Eligible women shall
25 be enrolled in the early detection breast and cervical cancer screening
26 program and additional eligible women may be enrolled to the extent
27 that grants and contributions from community sources provide sufficient
28 funds for expanding the program.

29 (4) Funds appropriated for the state program shall be used only to
30 operate early detection breast and cervical cancer screening programs
31 that have been approved by the department, or to increase access to
32 existing state-approved programs, and shall not supplant federally
33 supported breast and cervical cancer early detection programs.
